WELCOME ADDRESS

Dear Friends and Colleagues,

It is our pleasure to welcome you to the 21st *International Conference of the Association of Psychology and Psychiatry for Adults and Children (A.P.P.A.C.)*, held in Athens, on May 17 - 20, 2016.

This year's Conference 11th of a series on *"Neuropsychiatric, Psychological and Social Updates and Challenges"*. During the last years, the International Congresses of the A.P.P.A.C. became established annual meeting points, where participants have the opportunity to get in touch with the latest knowledge and exchange ideas with worldwide distinguished experts from different scientific areas, in a true multidisciplinary approach.

The 21st *International Conference*, will try to work further towards this direction, bringing participants closer to the progress on scientific research concerning clinical psychiatry, psychopathology, psychology, new diagnostic and treatment methods, genetics, and neurosciences. In our Conference, we once more emphasise the human dimension, linking science with society. To this end, there are some sessions with the participation of social workers, nurses, social anthropologists, educators etc.

The 21st Conference also serves the **educational mission** of the A.P.P.A.C.: it gives **CME credits** by the European Accreditation Council for Continuing Medical Education (EACCME), to certify that the participants have taken part in accredited education activities.

Attending this meeting in **Athens**, is also an opportunity to discover, or rediscover, a city of unique charm with a rich cultural and humanitarian tradition.

Athens is ideally suited to provide an atmosphere of true international spirit as the city has learned to deal successfully with the diversities of systems and the coexistence of different cultures. Today, the Greek capital is a modern, lively, vibrant, fascinating and beautiful city, with historic, cultural, scientific and modern achievements, a city you will enjoy to visit.

Welcome to Athens!
